SKILLS

- Javascript, HTML, CSS, Node.js, Express, PostgreSQL, React, APIs, Git/Github

PROJECTS

Fashion Footprint
An app created to reduce overproduction and waste in the fashion industry by allowing brands to release designs and styles pre-season so that consumers can share feedback through a voting system. App also educates consumers on how to care for their garments in an attempt to extend their lifecycle, as well as educating consumers on the environmental effects of different textiles.
- Utilized: React, PostgreSQL, CSS, Express, and Bootstrap
- Created backend using express, created user interface, reviewed pull requests

Wanderfull Web App
Developed a social media app as part of a team, that encourages users to share their endless amounts of travel photos and favorite foods. App allows users to interact with their friends on a responsive UI, where they can share/view/like posts, and search for posts by hashtag or location.
- Utilized: React, PostgreSQL, CSS, Express, and Material-UI Core
- Created database and routes, created user interface, reviewed pull requests

Lurk Web App
A social media web app built as part of a team. App allows users to interact with all users on the app on the feed, users can also follow (or "lurk") other users, and share/like posts.
- Utilized: HTML, Javascript, CSS, PostgreSQL, Express, and Font Awesome
- Created user interface, integrated data from database
